

## iJect touch mini UP

### inJect the easy way...

iJect touch mini UP

Wolfangel' s mini RTM machine with PLC iJect touch mini UP footprint is much less than 1 sqm. Thanks to the compact design and mobility it can be moved and placed wherever you like. The 4" colour touch panel allows the control of all iJect touch mini functions. 4 buttons allow easy access to the main functions.

The Siemens PLC ensures repeatable processes and part quality. An automatic flushing system guarants efficient and resource-saving cleaning. The GRP housing keeps the whole system free from materials and dust.
