# Product Information

The mobile vacuum system for many applications such as vacuum infusion, RTM or RTM light. A very reliable Becker vacuum pump is directly connected to a Vacmobile resin trap RT 19 and allows up to 8 hose connections. An integrated viewport ensures a view into the resin trap. The change of cardboard inserts is fast and without tools. The vacuum regulation and the gauge are mounted to the side and remain at place when removing the lid. This reduces the risk of damage.

Well thought out, simple, reliable and ready to use. Simply Wolfangel...
